

## Workshops Saturday

Nr.	Workshop Title	Starttime	Room	Language	Organization	Workshop Description
1	<b>When is a person declared dead? Diagnosis of brain death according to SAMS guidelines</b>	15:30  (Workshop 1&2 were combined to one workshop)	Y27-H-12  (Workshop 1&2 were combined to one workshop)	English	Swisstransplant	Accurate determination of brain death is a critical requirement in organ donation and transplantation medicine. This workshop will provide comprehensive information on the assessment of brain death from medical-physiological, organizational, legal, and ethical perspectives. It will further explain the role of the assessment of brain death in the organ donation process, covering both donation after brain death (DBD) and donation after circulatory death (DCD).
2	<b>Ex-vivo-Perfusion: How do organs function outside the body?</b>	See workshop 1	See workshop 1	English	Swisstransplant	Hurdles and perspectives of current and future developments in organ preservation.
3	<b>Führung durch das Krematorium Nordheim</b>	At meeting point at Irchel: 15:20	Not at Irchel Campus. Guide will be present. Meeting point will be communicated on our website.	German	Krematorium Nordheim	<p>Möchten Sie nach Ihrem Tod "als Ganzes", also in einem Sarg bestattet werden? Oder möchten Sie lieber kremiert werden, damit Ihre Asche in einer Urne beigesetzt werden kann? Oder soll Ihre Asche überhaupt nicht bestattet, sondern in den Bergen oder ihrem Lieblingsplatz im Wald verstreut werden? So individuell der Mensch, so individuell seine Wünsche; wie im Leben, so auch im Tod.</p> <p>Das Krematorium Nordheim ist seit 1967 in Betrieb und wurde soeben auf den neusten Stand der Technik gebracht. Bis zu 1300 Grad heiss sind die sechs Verbrennungsöfen Sie verwandeln einen</p>

						<p>Menschen durch Hitzeeinwirkung innerhalb von gut drei Stunden in Knochenasche. Im Jahr 2019 fanden rund 7'200 Kremationen im Krematorium Nordheim statt.</p> <p>Wie funktioniert so ein Krematorium überhaupt? Wer sind die Menschen, die sich tagtäglich mit den Toten und den Hinterbliebenen auseinandersetzen müssen? Wie gehen sie mit dieser Aufgabe um?</p>
4	<p><b>Clues Beneath the Surface: The Role of Forensic Imaging in Cracking Cases</b></p>	16:45	Y27-H-46	English	<p>Forensisches Institut ZH - Polizei- und Justizzentrum ZH</p>	<p>In this workshop, we dive into the cutting-edge realm of forensic imaging, showcasing various medical and non-medical scanning techniques, alongside a detailed exploration of normal findings in Post-Mortem Computed Tomography (PMCT). We will spotlight the pioneering work of the 3D Center Zurich, illustrating its pivotal role in advancing forensic 3D reconstruction. A highlight of our session will include a case study that integrates the aforementioned data, offering attendees a hands-on understanding of the intricacies involved in forensic reconstructions.</p> <p>Moreover, the workshop will address the critical role of clinical practitioners in forensic work. Given their often immediate contact with victims, the contributions of clinical practitioners are not only invaluable but also pivotal in the forensic process. We'll explore how techniques such as photography and photogrammetry are applied within hospital settings for capturing clinical evidence, thereby emphasizing the synergy between clinical practice and forensic investigation.</p>

5	<b>Assistierter Suizid und EXIT: Killer am Werk?</b>	15:45	Y27-H-25	German	EXIT	Dieser Workshop liefert das nötige Basiswissen, um Patienten informierend zur Seite zu stehen, sollte diese die Option eines assistierten Suizids in Erwägung ziehen. Nach einer Präsentation (Informationen zu rechtlichem Rahmen, Zahlen und Fakten zu EXIT,.....) steht Zeit für Fragen und Diskussion zur Verfügung.
6	<b>End-of-life-choices to safeguard quality of life: Switzerland as an international role model</b>	15:45	Y27-H-28	English	Dignitas	For 25 years, the Swiss non-profit membership association “Dignitas – To live with dignity – To die with dignity” engages internationally in combining suicide attempt prevention, palliative care, assisted dying and advance planning. The aim is to ensure personal quality of life until the end through freedom of choice, self-determination and self-responsibility, and to safeguard access to professional support for implementing respective needs. This also contributes to reducing the high number of lonely do-it-yourself suicide attempts which mostly fail with dire consequences. “Dignitas – To live with dignity – To die with dignity” acknowledges human’s needs and rights regarding freedom of choice and self-determination in life and at life’s end to be universal. This is why the organization provides access to its services irrespective of place of living and citizenship of the individual and engages in further legal development and education internationally.
7	<b>Die Dargebotene Hand backstage</b>	16:45	Y25-H-38	English	Dargebotene Hand	The best known mental health hotline in Switzerland – die Dargebotene Hand – has 200’000 contacts per year. Matthias Herren, Director of Zurich branch, provides you an insight how this line dealing with so

						many callers and topics and what are the tendencies in recent times.
8	<b>Developing faithful in vitro patient derived models for personalized medicine in sarcoma</b>	At meeting point at Irchel: 15:15	Not at Irchel Campus. Guide will be present. Meeting point will be communicated on our website.	English	Balgrist	In this workshop we are going to explain what we are doing to identify new "killer in sarcoma". You will also have the possibility to go around the Balgrist campus.
9	<b>Rare Diseases in Switzerland &amp; Orphan Drugs</b>	15:30	Y25-H-79	English	Zentrum für seltene Krankheiten USZ	What is the state of rare disease care in Switzerland? What means do we have to make our voices heard? But also: How does one develop a drug for rare diseases? What are the challenges and hurdles? What is the patient's perspective? How can we best and most constructively help them? Are other countries ahead of us? Join us for this highly interactive workshop and find out more...
10	<b>Debunking vaping myths and using Motivational interviewing for better health</b>	cancelled	cancelled	English	NPO – swimsa	Get ready for this workshop where you'll master the art of Motivational Interviewing, your key to unlocking patients' potential for positive change. After debunking myths we'll dive into role-plays, exercises, and real-world case studies, equipping you with the skills to inspire patients, navigate ambivalence, and kindle their motivation in their journey to optimal health!

11	<b>Pulse of Humanity: Tackling Healthcare challenges during Humanitarian Crisis</b>	16:45	Y22-F-62	English	NORP - swimsa	Join our workshop on "Healthcare Resilience During Humanitarian Crises" – a dynamic discussion aligned with our ongoing CoPHR policy paper. Delve into the intricate challenges faced by health systems in crises, exploring detailed backgrounds and engaging in a collaborative search for viable solutions. Your insights matter in shaping innovative approaches. Be part of this impactful session that goes beyond the problems to foster meaningful dialogue and proactive problem-solving. Together, let's pave the way for a more resilient healthcare future in humanitarian crises. Don't miss out on being a catalyst for change!
12	<b>Suturing workshop</b>	15:30	Y44-H-05	English	Young Surgeon Students Association (YSSA)	YSSA Switzerland organizes suture workshops in six different cities across the country. This is the first time some YSSA members are getting together to provide a unique suture course. Whether it's your first time handling a needle holder or you're "almost" a plastic surgeon looking, join us, refine your techniques and acquire new skills.
13	<b>ABBCDE approach</b>	15:30	Y42-J-11	French	MEDIC	Evaluating a patient in an emergency room.
14	<b>Basics of Emergency Sonography</b>	16:00	Y25-H-86	English	Young Sonographers	„Ultrasound is the stethoscope of the 21st century“ and is therefore becoming increasingly important, especially in emergency medicine. But why should all doctors be proficient in emergency sonography?  Sonography offers a structured overall organic status assessment in the shortest possible time and thus the exclusion of the most important killers in the shock room. In this workshop we will show You how

						<p>to visualize the most important of these killers, using sonography:</p> <ul style="list-style-type: none"> <li>- Aortic aneurysms</li> <li>- Pericardial tamponade</li> <li>- Pneumothorax</li> <li>- Free fluid in predestined spaces of the abdomen after trauma</li> <li>- Recognition of acute appendicitis</li> <li>- Spleen- / liver rupture</li> <li>- Acute renal insufficiency as a result of renal congestion due to kidney stones</li> <li>- Deep vein thrombosis</li> <li>- EUG's</li> </ul>
15	<b>Ein Tag mit AGT im Schulunterricht- Medizinstudierende für rauchfreie Schulen.</b>	Cancelled	cancelled	German	Aufklärung gegen Tabak (AGT)	<del>Interessante Facts rund um Tabak und Nikotin sowie die Folgen eines langjährigen Konsums. Was hat es mit den neuen Produkten auf dem Markt auf sich?</del>
16	<b>Breaking the Silence</b>	15:30	Y23-G-04	English	M.E.T.I.S	<p>Have you ever been treated by a doctor that does not speak a word in your language? Unfortunately, this does happen a lot more than one would think, because as this moment, there is very little physicians in Switzerland that are bilingual in sign language.</p> <p>M.E.T.I.S. project Breaking the silence aims to raise awareness among students and health care professionals about Deaf culture and the problems these patients might experience during medical consultations. We want to enable caregivers to interact with hearing impaired patients in their future practice. In this workshop, we will present you some problems a deaf patient faces during a medical consultation, and teach you some basic vocabulary</p>

						of sign language! That will include some signs that will be useful in the medical field.
17	<b>Exploring the Death of Medical Dreams: Overcoming Hurdles and Embracing Opportunities</b>	16:00	Y13-M-12	English	NCWiki	Have you ever contemplated the driving forces behind your decision to study medicine? Given that you possess the essential human qualities of intelligence, empathy, and determination, do you believe it's always feasible to fulfill your aspiration of becoming a doctor in a country like Switzerland? Dive into an interactive workshop with NCWiki, where we unravel the intricate socio-economic dynamics impacting your journey through the medical school entrance exam (Numerus Clausus). Join us to take a look at the issue from beyond our own plate and broaden our horizons together.
18	<b>Intersectional approach in Medicine</b>	Cancelled	Cancelled	English	NORA—swimsa	<del>When we talk about discrimination, biases and privilege, focusing on one area or another (gender, race and ethnic identity, (dis)ability, socio-economic status, etc) allows us to examine how specific identities affect people in different ways. However, individuals are often a complex and unique combination of these identities! This is why we should prefer an intersectional approach, which recognises that multiple intersections between identities exist in endless combinations, and that they can sometimes lead to privilege and sometimes to discrimination. In this workshop, we'll explore together what intersectionality is and how to apply it in a clinical setting.</del>

19	<b>Presentation Skills</b>	Cancelled	Cancelled	English	NOCB—swimsa	Improve your presentation skills with some fun exercises. We will have some input and different activities to train what we learned

## Workshops Sunday

Nr.	Workshop Title	Starttime	Room	Language	Organization	Workshop Description
1	<b>How to achieve the most in a medical emergency with many patients. Leadership under duress and a good tactical understanding how to organize in a demanding incident.</b>	10:45	Y27-H-25	English	JDMT Medical Services AG	<p>The aim is to understand what constitutes a major medical event and how to organise yourself during such an event. The aim is to make the most of the resources available without putting yourself at risk.</p> <p>Workshop procedure: Participants form groups that would be deployed as emergency teams in a major incident. Based on scenarios, they have to answer questions and present how they would organise themselves during an incident. This is supplemented by insights from practice and a "how to react in a...".</p>
2	<b>Heart2Heart</b>	10:45	Y25-H-38	English	Dargebotene Hand	More and more English-speaking people living in Switzerland are not able to communicate in one of the national languages. In urban areas such as Zurich, the number of English-speaking residents has increased almost sevenfold in the past twenty years, to over 12 percent of the population. This

						<p>percentage is similarly high in the canton of Zug and in the Lake Geneva region.</p> <p>The impact of the increasing number of English-speaking people is already being felt by Die Dargebotene Hand. Although the services of Tel 143 are currently only available in the respective national languages, a rising number of callers are requesting a conversation in English. In recent times, the number of English-speaking callers contacting Die Dargebotene Hand in the Zurich region has doubled from year to year. Even though many of these people have a basic knowledge of a national language, they are not always able to talk about their problems in German, French or Italian in crisis situations.</p>
3	<b>Exploring the Death of Medical Dreams: Overcoming Hurdles and Embracing Opportunities</b>	10:45	Y22-F-70	English	NCWiki	<p>Have you ever contemplated the driving forces behind your decision to study medicine? Given that you possess the essential human qualities of intelligence, empathy, and determination, do you believe it's always feasible to fulfill your aspiration of becoming a doctor in a country like Switzerland? Dive into an interactive workshop with NCWiki, where we unravel the intricate socio-economic dynamics impacting your journey through the medical school entrance exam (Numerus Clausus). Join us to take a look at the issue from beyond our own plate and broaden our horizons together.</p>
4	<b>Suturing workshop</b>	10:45	Y44-H-05	English	Young Surgeon Students	<p>YSSA Switzerland organizes suture workshops in six different cities across the country. This is the first time some YSSA members are getting together to</p>

					Association (YSSA)	provide a unique suture course. Whether it's your first time handling a needle holder or you're "almost" a plastic surgeon looking, join us, refine your techniques and acquire new skills.
5	<b>Debunking vaping myths and using Motivational interviewing for better health</b>	10:45	Y27-H-12	English	NPO – swimsa	Get ready for this workshop where you'll master the art of Motivational Interviewing, your key to unlocking patients' potential for positive change. After debunking myths we'll dive into role-plays, exercises, and real-world case studies, equipping you with the skills to inspire patients, navigate ambivalence, and kindle their motivation in their journey to optimal health!
6	<b>Pulse of Humanity: Tackling Healthcare challenges during Humanitarian Crisis</b>	10:45	Y22-F-62	English	NORP - swimsa	Join our workshop on "Healthcare Resilience During Humanitarian Crises" – a dynamic discussion aligned with our ongoing CoPHR policy paper. Delve into the intricate challenges faced by health systems in crises, exploring detailed backgrounds and engaging in a collaborative search for viable solutions. Your insights matter in shaping innovative approaches. Be part of this impactful session that goes beyond the problems to foster meaningful dialogue and proactive problem-solving. Together, let's pave the way for a more resilient healthcare future in humanitarian crises. Don't miss out on being a catalyst for change!
7	<b>Ein Tag mit AGT im Schulunterricht - Medizinstudierende für rauchfreie Schulen.</b>	10:45	Y22-F-68	German	Aufklärung gegen Tabak (AGT)	Interessante Facts rund um Tabak und Nikotin sowie die Folgen eines langjährigen Konsums. Was hat es mit den neuen Produkten auf dem Markt auf sich?

8	<b>eFAST - Using Ultrasound to look for internal Bleeding</b>	10:45	Y25-H-86	English	Young Sonographers	eFAST - a focussed examination with sonography for trauma. This examination offers painless thoracic and abdominal examination and information acquisition without radiation exposure for the patient in the shortest possible time. Through eFAST, time can be saved in the shock room, therefore winning valuable time for the patient, leading to an improved treatment of trauma patients in mortal danger.
